BMC Global Select

The World's Finest Companies

June 2026

Important information

BMC Global Select Fund is a Light green (article 8 according to SFDR), UCITS regulated equity fund with a global mandate.

This presentation is intended for pure information only and must not be construed as an offering, solicitation or recommendation to make an investment and does not constitute any investment advice. Past performance is not a guarantee of future returns. The value of shares in the fund may go up or down, and an investor may not get back the amount originally invested. An investment decision should be based on the information in the fund's fact sheet, Key Investor Information Document ("KIID"), full prospectus, and the latest published annual and half-yearly reports.

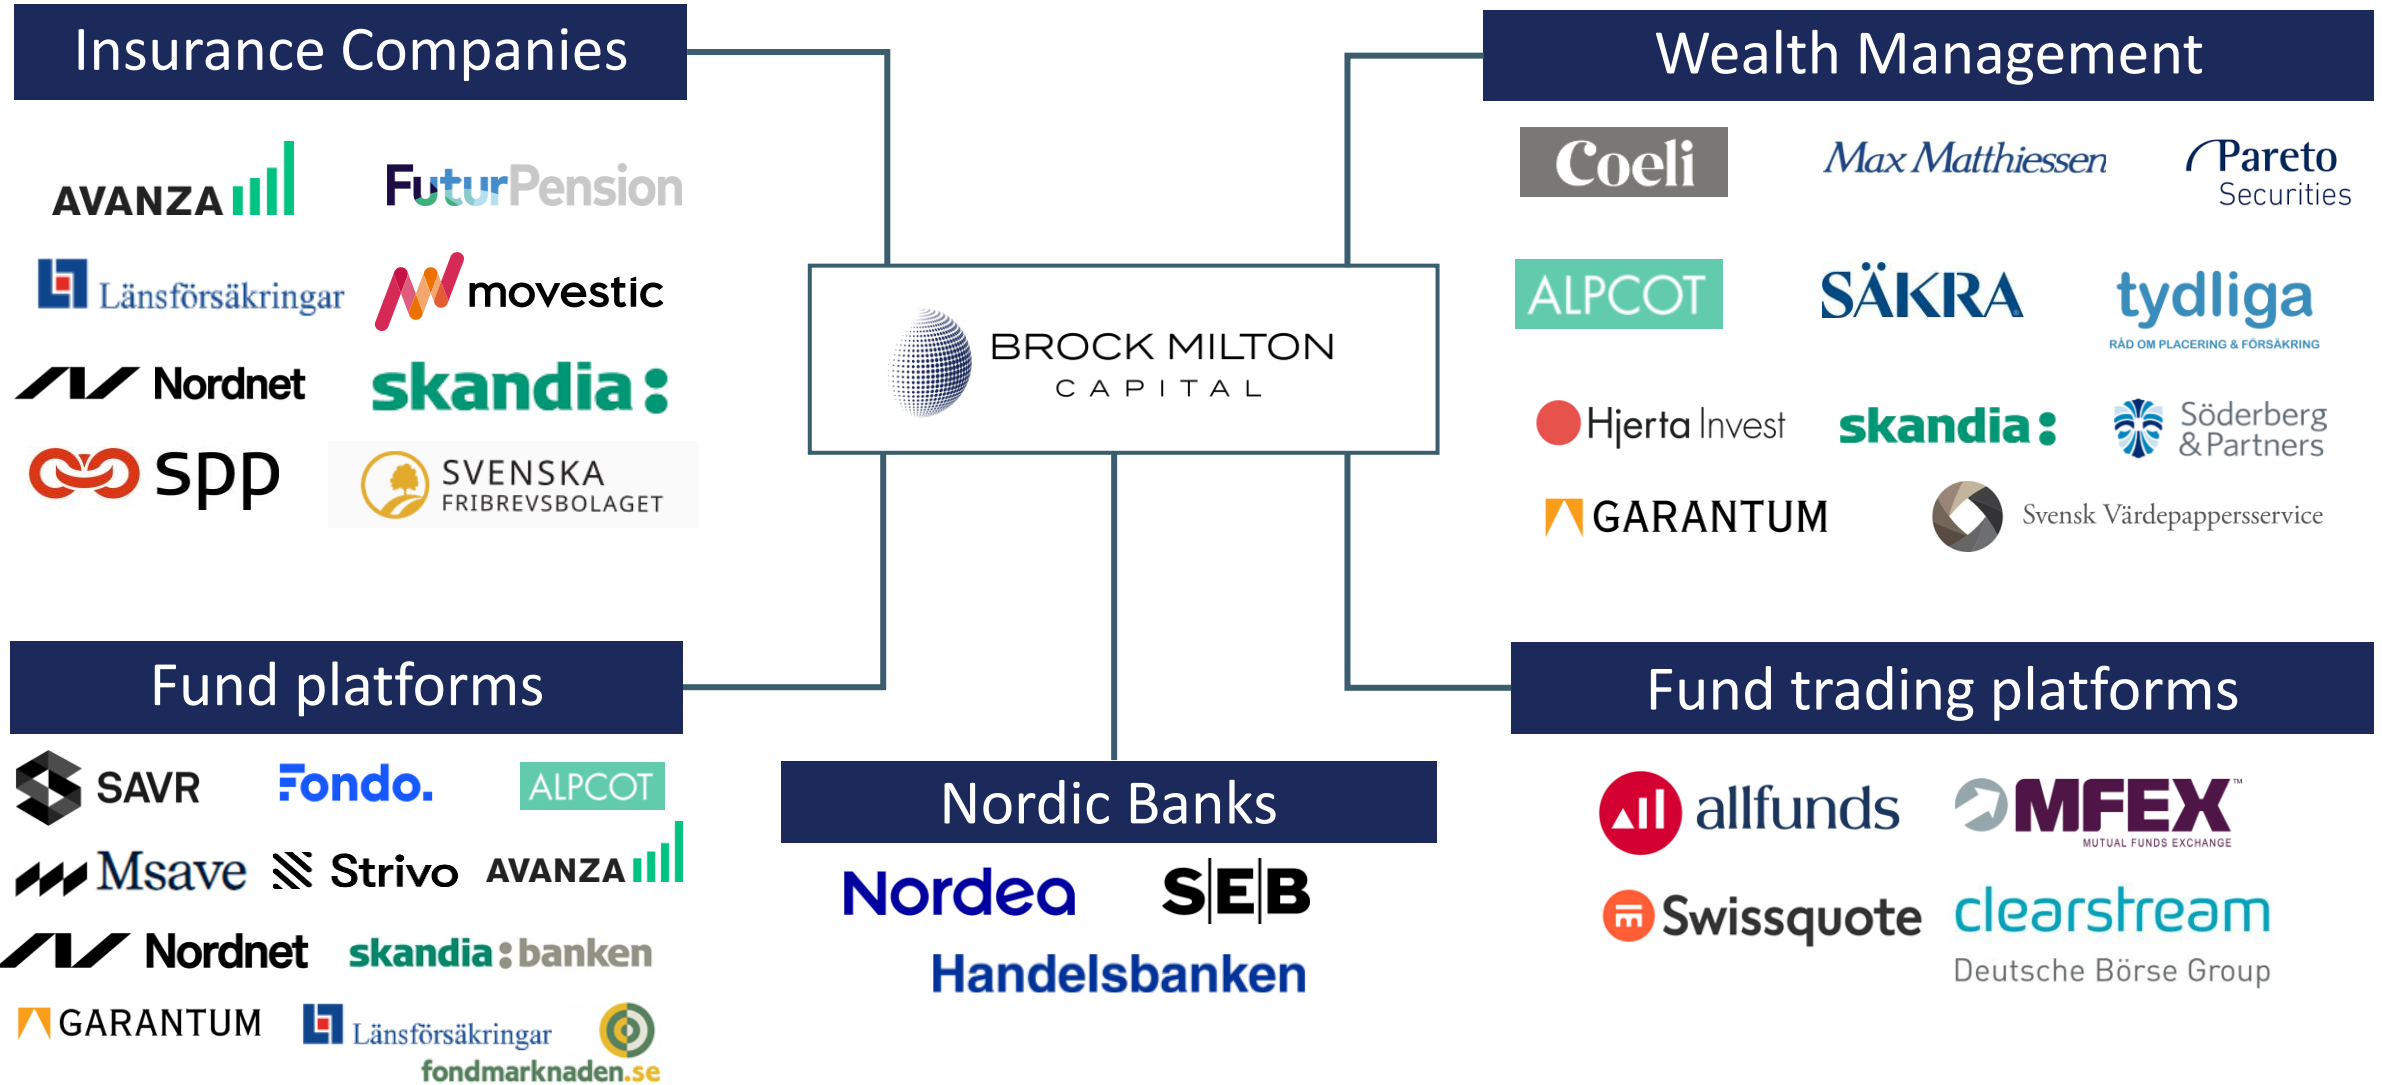

The return shown in the presentation is adjusted from management & performance fees

These documents are available at www.bmcapital.se and can also be acquired directly from Brock Milton Capital.

PROSPECTUS

6 FEBRUARY 2025

BROCK MILTON CAPITAL UCITS SICAV – BMC GLOBAL SELECT FUND
BROCK MILTON CAPITAL UCITS SICAV – BMC GLOBAL SMALL CAP SELECT FUND

BMC Global Select Fund - overview

- **Our strategic goal is a 15% annual return over a business cycle.** This target should allow us to achieve our ambition of beating our benchmark over time.
- **Boutique asset manager** with partner model and skin in the game.
- **Concentrated global long-only equity UCITS fund** with 25-35 holdings. AUM >2 bn USD.
- **Actively managed** with at least 2/3 invested in Champions - the world's finest companies and up to 1/3 in Special Situations.
- **ESG focus** - Light green fund, article 8 according to SFDR. The fund does not invest in alcohol, military equipment, tobacco, gambling, oil and gas, or companies that breach international norms. The fund actively selects companies with a high ESG profile and influences them towards a more sustainable way of working.

Champions – Industry leaders

- No. 1 or 2 in their industry
- Active in an industry with high profitability and good growth
- Has created good competitive advantages, such as:
 - ✓ Economies of scale, brand, service network, strong customer relationships, internal processes
- Robust balance sheet
 - ✓ Preferably debt-free
- Reasonable share valuation
 - ✓ Typically, a P/E around 20-35x
- Strong corporate culture and management with a proven ability to lead the company successfully through the business cycle
- Open and honest communication with the financial markets, through both ups and downs

L'Oréal's share price and EPS 2010-2024

Champions – Industry leaders

L'Oréal:s share price and EPS 2010-2026

Champions – Generating alpha through long-term view

Microsoft

Earnings 55% better five years out estimated due to strong cloud growth and continued execution

Atlas Copco

Earnings 36% better five years out estimated due to strong growth in vacuum division and continued execution

MSFT: UBS analyst estimates from November 2017

ATCO: UBS analyst estimates from July 2018

Academic research supports our approach

Research underpinning our work

- **Growing firms outperform firms with poor growth** – Mohanram 2005
- **Stocks with high profitability outperform** – Novy-Marx, 2014
- **Firms with low leverage have high alpha** – George and Hwang 2010; Penman et al. 2007
- **Managers who have "skin in the game" outperform** – Ibert, 2023

Quality Investing

Robert Novy-Marx

Buying high quality assets without paying premium prices is just as much value investing as buying average quality assets at discount prices. Strategies that exploit the quality dimension of value can be profitable on their own, and accounting for both dimensions of value yields dramatic performance improvements over traditional value strategies. Gross profitability is particularly powerful among popular quality notions, especially among large cap stocks and for long-only investors.

What is quality investing, and how should quality be measured? Quality, unlike value, has no universally accepted definition. Value strategies are easily identified by the fact they hold stocks with low valuations. Quality strategies, in contrast, are generally identified using something more akin to Supreme Court Justice Potter Stewart's obscenity doctrine of "you know it when you see it" (*Jacobellis v. Ohio*, 1964). This paper attempts to identify commonalities across seven of the best know quality strategies. It also looks for differences, running a performance horse race between alternative quality strategies.

Quality is often marketed as an attractive alternative to traditional growth strategies, which performed terribly both during and after the NASDAQ deflation in the early 2000s. Its leading industry proponents include GMO's Jeremy Grantham, whose high quality indicators of "high return, stable return, and low debt" have shaped the design of MSCI's Quality Indices, and Joel Greenblatt, whose "Little Book that Beats the Market" has encouraged a generation of value investors to pay attention to capital productivity, measured by return on invested capital, in addition to valuations.

Special Situations – Investment opportunities

- Companies that the market doubts but that are on the cusp of positive change
- Acceptable indebtedness
- Often cheaper shares, sometimes trading under book value or with an expected P/E of 5-15x
- Share price expected to increase at least 20-100% over the coming three years
- Unappealing to long-term investors based on industry structure or growth potential. Holding is sold once the share price reaches expected valuation
- Typical industries:
 - Banks, Construction, Agriculture, Shipping, Basic Materials. Engineering

Special Situations – contribution analysis

Active management in turbulent times

Special Situation – Good investment opportunities

Coeli Global: ESG impact score	27.5%	
10. The UN sustainable development goals (SDG)		
According to the company, how many of the UN SDGs does it contribute to?	8	
SDG: 5,7,8,9,11,13,16,17		

Name of the company:	Catena
Bloomberg code:	CATE SS EQUITY
Market cap (MUSD):	1,861
1. Summary	
Coeli Global: Fund exclusion criteria:	✓
Coeli Global: ESG impact score:	28%
Taxonomy eligible activities as percent of revenues:	100%
Number of UN SDGs contributing to:	8
2. Our conclusions	
<p>Catena is committed to ESG. The company has implemented science-based environmental targets and an ambitious net zero policy by 2030. Catena invests much in green initiatives such as rooftop solar power and energy saving measures. For instance, it recently announced up to 500 MSEK worth of potential sustainable energy investment. Moreover, Catena has low governance risk. It has all its operations in Scandinavia, a low-risk region from a governance perspective. It has strong ownership backed by one of the most credible Swedish real estate investors (and no cross-ownership as seen in many Swedish real estate companies), and it has adopted and is following several international ESG-related standards and protocols. The gender balance among its top leadership is also good at more than 40% females. We encourage Catena to continue with its green investments and would recommend it to link remuneration to these initiatives. We also encourage Catena to set up an internal audit function.</p>	
3. ESG risks identified (which may have material impact on the business)	
<p>EU regulation around the energy efficiency of buildings poses a material risk to Catena. If it is not able to comply with these regulations, Catena may ultimately lose business. However, energy savings seem to be on the top of its agenda, significantly reducing this risk.</p>	
4. Controlling shareholder	
<p>We deem the controlling shareholder(s) (normally the Chair of the Board or the CEO) to ultimately be the most influential power in the company, particularly when it comes to soft items such as business ethics, culture, and values, which are very hard to judge as an outsider. Catena is controlled by the Erik Paulsson family, through the family-controlled investment company Backhill. They have approx. 22% of the capital and the voting rights. The Erik Paulsson family is represented on the board by Lennart Mauritzson, the CEO of Backhill. We deem the family to be good, long-term focused owners with a very good reputation, particularly when it comes to real estate investments.</p>	
5. Questions and issues to discuss	
<p>We will encourage Catena to implement ESG-related targets linked to the executives' remuneration. We will also encourage it to set up an internal audit function.</p>	
6. Next step and outcome	
<p>Set up a meeting during spring 2023</p>	

Name of the company:	Catena
Bloomberg code:	CATE SS EQUITY

Step 2: Sustainability - ESG

Excludes:

- Fossil fuel producers (>5% of revenues)
- Alcohol manufacturers/distributors (>5% of revenues)
- Weapons manufacturers (>5% of revenues)
- Tobacco producers and retailers (>5% of revenues)
- Gambling (>5% of revenues)
- Companies that breach international norms on human rights, working conditions, the environment, and anti-corruption
- Russian companies

Includes:

- Own analysis – brakes for electric vehicles (Brembo), environmentally friendly gas (Beijer Ref, Carel), energy (Vestas)
- Idea generation from Barron's Top 100 Sustainability (Thermo Fisher, American Water Works, Ecolab)
- Idea generation from Corporate Knights 100 most sustainable corporations (Neste)

Impacts:

- ESG impact letter to the companies we define as Champions, outlining our expectations as a shareholder
- Discussion with portfolio companies regarding ESG – for example, with Carel on the importance of signing the UN Global Compact and with Beijer Ref on the internal audit function.
- Voting at AGM

Quantifies:

- Own developed model that quantifies ESG risks and opportunities.

Portfolio key ESG metrics, as of 2025-09-30

Signatory of UN Global Compact

60%

Lower scope 1 & 2 emission in our fund vs our benchmark

57%

Proportion of our Portfolio holdings which are committed to the Paris Agreement

Portfolio companies with an internal audit function

Portfolio companies with split CEO / Chairman

% of portfolio companies measuring scope 3

% of Women on the Board of Directors

% of Women in management positions

Step 3: Active portfolio management

Portfolio Structure

- Balanced portfolio
- 25-35 holdings
- >2/3 "Champions"
- <1/3 "Special Situations"
- Typical portfolio weights
- Champions 3-5%
- Special Situations 2-4%
- Capacity to trade EUR 100 million a day

Portfolio Guidelines

- US: 40-70%
- Europe: 20-40%
- Emerging and frontier markets: 0-20%
- <25% small caps
- Cash: normally fully invested (less than 2% cash)

Step 3: Risk Management

Portfolio risk

- Daily risk analysis and compliance assessment conducted by custodian, MDO in Luxembourg
- Monthly risk meeting with Coeli's Chief Risk Officer
- Fund managers' continuous monitoring of financial development and ESG performance of the portfolio companies
- Monthly audit of insider activity

Sales discipline

- Fund managers sell holdings given:
 - A change in investment principles – can be fundamental and/or valuation-related
 - A portfolio upgrade

The fund's exposure to growing & profitable trends

Special situation

Samsung – Firing on all cylinders in memory and foundry

Investment thesis

- **A global semiconductor company**

Samsung is a one of the largest semiconductor companies in the world. The company is active in semiconductor manufacturing and design. It is the largest DRAM producer and the second largest foundry after TSMC. Samsung is based in Seoul and was founded in 1938. The two co-CEOs own shares worth 20m USD. The largest shareholders are Samsung Life 7,6%, National Pension 6,7% and Blackrock 5,0%.

- **AI chip demand fuels growth in both memory and foundry**

Samsung is one of the three major producers of HBM memory chips for AI chips. They are currently shipping both to Nvidia and AMD. Besides memory, Samsung also operates as foundry which has been struggling before but has now won Nvidias as a customer for their 4nm chip to the new Groq AI chip. Thus, Samsung is the only company currently benefitting from both logic and memory demand.

- **Further upside from memory prices and new foundry customers**

We think memory prices can continue to increase as there is limited capacity coming the next two years. We also think the new foundry customer in Nvidia is a game changer as the foundry business can finally reach profitability. Thus, we see upside of 50% as the company is still cheap on PE 7x. Downside is 20% in case of broader slowdown.

- **ESG: All is green**

Our pre-trade compliance check generated no warning signals. The company is not Russian, does not exceed limited exposure of any of our exclusion sectors, is not red-flagged for violations against international norms and the shares are liquid.

Financial data

Revenues FY2025: 223bn USD

Value drivers by geography

- US 40%
- South Korea 14%
- Europe 16%
- China 14%

Value drivers by revenue stream

- DS (semis) 39%
 - Memory 31%
 - Foundry 8%
- DX (devices) 56%

Largest customers

- No customer >10% of total sales

Special Sits

Wesco: Leading US distributor of electrical, communication and utility products

Investment thesis

- **Benefits from scale, pricing power and secular tailwinds, incl. datacenter**

Wesco is the largest distributor of electrical, communication and utility products and components in North America with a market share of 10-15% in a very fragmented market. For manufacturers, Wesco acts as a sales and distribution partner reaching a fragmented customer base. For customers, Wesco provides logistics, value-added services, financing, and purchasing discounts. Wesco is benefiting from scale advantages, strong pricing power (distributors pass on inflation to their customers) and exposure towards structural growth sectors such as data center (today ~20% of the total, after growing >50% in 2025), electrical infrastructure and large-scale utility investments. The business generates stable and strong cash flows, supported by a resilient distribution model and countercyclical working capital dynamics. Revenue exceeds 20 bn USD with ~6% EBITDA margin. The company has grown revenue by ~10% annually over the past 10 years. Underlying growth has been 3–5% per year, with the remainder driven by acquisitions. The largest shareholder, with 16% of the shares, is BlackRock. CEO, John Engel, owns shares worth >100 MUSD

- **We expect Wesco to grow EPS 10-15% over time**

Going forward, the ambition is to grow revenue by 5–8% annually through (1) underlying market growth of 3–4%, (2) market share gains of 1–2%, and (3) M&A of 1–2%, while improving margins by 20–50 bps per year through scale, product mix, digitalization, etc. Over 2026–2028, Wesco is expected to generate substantial free cash flow, enabling continued M&A and shareholder returns (primarily buybacks).

- **Adj. P/E of ~18x on 2026E is still attractive**

Wesco is currently trading to adj. P/E 2026E of ~18x. This is an attractive valuation for a resilient business model with strong secular tailwinds. The multiple is above historical levels, but we have never seen momentum like this. Key risks are mainly around a slowdown in the US economy in general and non-residential construction in particular.

- **ESG: All is green**

Our pre-trade compliance check generated no warning signals. The company is not Russian, does not exceed limited exposure of any of our exclusion sectors, is not red-flagged for violations against international norms and the shares are liquid. There are no conflict of interests.
